It does not require involvement in their surgery, just their pre and/or post transplant care.

Tushar-

Per our conversation earlier today, you requested that I send you a list of patients who were transplanted between 7/2015 and 6/2016. However, that is approximately 50 patients and I have no idea which patient's care you were involved. It would be helpful if you could be more specific about which patient's transplant surgeries you observed. If you can think of any specific dates, details, etc., let me know. Is there someone in the fellowship program who keeps track of the transplant surgeries you observed?
