

UNITED STATES MEDICAL LICENSING EXAMINATION™

USMLE Step 1 is administered to students and graduates of U.S. and Canadian medical schools by the National Board of Medical Examiners® (NBME®)
3750 Market Street, Philadelphia, PA 19104
Telephone: (215) 590-9700

STEP 1 SCORE REPORT

Shah, Tushar N

USMLE ID: 3-432-291-7

**3317 Appling Way
Durham, NC 27703**

Test Date: June 1994

The USMLE is a single examination program for all applicants for medical licensure in the United States; it replaces the Federation Licensing Examination (FLEX) and the certifying examinations of the National Board of Medical Examiners (NBME Parts I, II and III). The program consists of three Steps designed to assess an examinee's understanding of and ability to apply concepts and principles that are important in health and disease and that constitute the basis of safe and effective patient care. **Step 1** is designed to assess whether an examinee understands and can apply key concepts of the basic biomedical sciences, with an emphasis on principles and mechanisms of health, disease and modes of therapy. Results of the examination are reported to medical licensing authorities in the United States and its territories for use in granting an initial license to practice medicine. The two numeric scores shown below are equivalent; each state or territory may use either score in making licensing decisions. These scores represent your results for the administration of Step 1 on the test date shown above.

PASS

This result is based on the minimum passing score set by USMLE for Step 1. Individual licensing authorities may accept the USMLE-recommended pass/fail result or may establish a different passing score for their own jurisdictions.

219

This score is determined by your overall performance on the examination. The score scale is based on the performance of students in medical schools accredited by the Liaison Committee on Medical Education (LCME) who took the NBME comprehensive Part I examination for the first time in June 1991 and were two years from expected receipt of the medical degree at the time they were tested. The scale is defined to have a mean of 200 and a standard deviation of 20 for this group. Most examinees receive a score between 140 and 260. A score of 176 is set by USMLE to pass Step 1. The standard error of measurement (SEM)⁺ for this scale is four points.

87

This score is also determined by your overall performance on the examination. A score of 82 on this scale is equivalent to a score of 200 on the scale described above. A score of 75 on this scale, which is equivalent to a score of 176 on the scale described above, is set by USMLE to pass Step 1. The SEM⁺ for this scale is one point.

⁺Your score is influenced by both your general understanding of the basic biomedical sciences and the specific set of items selected for this Step 1 examination. The SEM provides an estimate of the range within which your scores might be expected to vary by chance if you were tested repeatedly using similar tests.
